DEPARTMENT OF BOTANY**

EDUCATIONAL FIELD VISIT TO TN-ARRI-ADUTHURAI

The staff and students of Botany department have to visit the **Tamil Nadu Rice Research Institute** on **02.08.2019** with a batch of 47 students. On the field trip, the students have learned more about agricultural science, such as plant breeding, the cultivation of new rice varieties, and insect control techniques (entomology), benefits of biofertilizer to the cultivating crops and manufacturing of fiber cloths from fiber plants. This field visit was scheduled in accordance with the plant pathology and protection syllabus. The Rice Research Institute was arranged for a mentor to train the students in bio-fertilizer production, mushroom cultivation, azolla and azosprillum production, metrological instrumentation handling techniques, and the production of short-term banana tree.
